### Study Tour for MCC managers and owners

Special study tour was conducted for MCC managers and owners. 5 people were sent to “Cattle Breeding Product Producers’ Association” in village Tibaani, Kakheti region. During the 5 days, the above persons were taught the practical aspects of MCC management. Experienced local experts and consultants provided the on-the-job training in the local MCC, during which the trainees obtained information on such aspects as how to receive milk, conduct operations of milk quality control, how to operate Lacto Scan, how to keep records in MCC, etc. During the first day of the study tour, participants observed all the operations and during the next days performed all the operations themselves under the direct supervision and control from the trainers.

### Creation of mini cheese processing enterprise on the basis of existing MCC

MCC “Laitieri” was selling its milk to small, primitive cheese processing workshop, where did not exist the elementary sanitary norms. At the same time, this processing workshop was getting bigger profit from milk processing than MCC from the milk collection. Accordingly, MCC managers came up with the business idea – transform MCC into the small cheese processing enterprise, which will be equipped with modern cheese processing equipment and ensure that all production process will go according to the sanitary standards. This idea was supported by Heks Eper and ABCO received the order to for implementation of this project.
